

Top of the Funnel

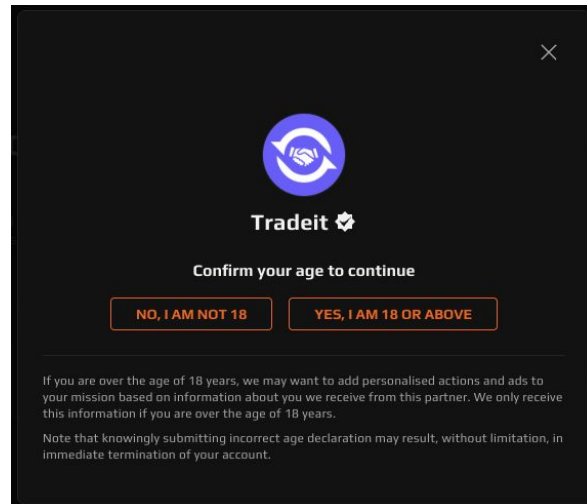

“Declared age modal”

ADS TEAM

Problem: From September 2025 onwards, Tradeit Missions experienced a sharp and sustained decline in Account Link (AL) volume. The drop is global, not isolated to a single region, and cannot be explained by a reduction in active / activated players.

Hypothesis: Since the age modal was introduced in August, we believe removing it will lead to an increase in the account linkage rate.

Overview & results

	<i>Control</i>	Variant
Activated	<i>233,000</i>	227,000
Completed	<i>3,300</i>	8,700
Completion Rate	<i>1.5%</i>	3.9%

Looking at the impressions tracking event for Control we can see that there's a high drop rate

Age Step Shown	6,188
Age = Yes	3,451
Age = No	2,497

Next Steps

1. Remove the age modal for now, until we have reviewed it with Privacy
2. Enabled -18 users
3. Check the drop in the flow
 - a. control: user see the modal (but not the age)
 - b. variant: user doesn't see any modal → straight to Tradeit to input the details

Top of the Funnel

"Mystery Box"

ADS TEAM

Problem: In long-term partnerships, account linkage rates can decline over time, limiting partner value and reducing the number of users into the funnel

Hypothesis: Applying a “mystery reward” framework will use curiosity and variable-reward psychology to increase motivation for account linking, as users perceive it as a free, low-effort opportunity with potential upside.

250
- 
500
- 
1,000
- 
5x Super Match
Tokens
- 
1-month
of Premium

Overview & results

The Mystery Box variant **delivered a +61% relative lift** (+0.83pp) in account linking vs control with comparable user quality and volume. This is a clear positive signal to continue or scale the mechanic.

	<i>Control</i>	Variant
Activated	<i>147,105</i>	146,131
Completed	<i>1,854</i>	2,955
Completion Rate	<i>1.36%</i>	2.19%

From a privacy and compliance standpoint, account linking does not involve any payment or monetary consideration from users. As there is no cost to participate, this activity does not constitute gambling

Total Costs

Due to time limitations, we were unable to cap or weight the random reward distribution. This led to an equal distribution across all five reward tiers, including the highest-value items, which increased the total mission cost

1. Variant Mission: 2028 paid - **\$616.08 + \$5K**

- Premium monthly Sub: 485 (24%)
- 1000 FP: 527 (26%)
- 250 FP: 516 (25%)
- 500 FP: 500 (25%)

2. Control Mission: 1864 Paid - **\$739**

- 500 FP: 864 Paid (100%)

Next Steps

- Calibrate the number of reward per Mission to reduce the costs
- Decide if enable the Mystery Box as default for linkage missions
- Test the concept of Drops vs. Mystery Reward to engage the gamification

Backlog of ideas:

- Mystery value tiers
- Limited-time mystery bonuses
- “Rare drop” probabilities
