

Prebid Evaluation: Moba vs Publift

A/B test on CSStats.gg — 20 days, 7.1M page views
25 Feb – 16 Mar 2026

Platform: CSStats.gg (1.2M DAU, 9.3M MAU)

Split: 50/50 via GA experiment

Primary metric: Revenue per Page View

Exclusion: Russia (GAM unavailable)

Moba outperforms Publift by **+7.8%** on net RPV

After deducting Publift's ~15% commission, Moba delivers higher Revenue per Page View across **all three market tiers**. US excluded due to data anomaly.

US Revenue Anomaly (234x discrepancy)

The numbers

	Moba	Publift
Page Views	6,312	5,498
Revenue	\$67.84	\$0.29
eCPM	\$10.75	\$0.05

Possible causes

- Publift may lack US demand partners on this unit

Action: Investigate GAM config before using US data. Does not block non-US rollout.

Experiment Setup & Key Decisions

Setup

- **Platform:** CSStats.gg — 1.2M daily users, 9.3M MAU
- **A/B split:** 50/50 via GA experiment (ads_ab_variant)
- **Duration:** 20 days (25 Feb – 16 Mar 2026)
- **Page views:** Moba 3.59M / Publift 3.52M (excl. Russia)

Data Sources

- GA4 page views by experiment cohort & geo
- GAM: Moba ad units (2 IDs)
- GAM: Publift ad unit (1 ID)
- Internal tier classification (T1: 8, T2: 33, T3: 90)

Key Decisions

- **Russia excluded** — GAM does not operate there; 2.6M views removed from both cohorts
- **Fill rate rejected** — Publift uses a GAM placeholder line item for unfilled impressions, inflating fill rate to ~100%
- **RPV as primary metric** — Revenue per Page View is the only apples-to-apples comparison
- **Publift commission** — ~15% deducted from gross to show true publisher revenue
- **US presented separately** — 234x anomaly flagged for investigation

Validate on FACEIT & expand to outstream

The test on CSStats generated enough data to demonstrate a significant revenue uplift. From a product perspective, it is worth validating the same approach on FACEIT.

1 Run Moba prebid experiment on FACEIT

Replicate the CSStats A/B test on FACEIT display inventory to validate uplift at scale with our own audience.

2 Test Moba prebid for outstream video

Extend the evaluation to outstream video inventory — a separate demand layer where prebid competition could unlock additional yield.

3 Investigate US anomaly

Verify GAM ad unit config & demand partner setup for the 234x revenue discrepancy. Does not block non-US rollout.

CSStats result: Moba delivers **+7.8%** higher net RPV than Publift across all tiers (excl. US). Over the 20-day test: \$441.99 Moba vs \$401.95 Publift net — ~\$40 incremental revenue.
